Service TV 36 – Decembrie 2016

315 Ecrane LCD-LED

Pentru acestea sunt date urmatoarele informatii :
– Fabricantul - cel marcat pe eticheta aflata pe spatele ecranului
– Core – ce ecran se afla in interior de fapt
– modulul TCON – codul modulului daca este separat sau principalele integrate (procesor , buffer gamma sau controler sursa DC- DC) daca este inclus pe driverul superior
– codurile driverelor superioare – marcate pe PCB
– codurile driverelor laterale (daca nu sunt in ecran)
– unul din televizoarele in care a fost intalnit (deoarece toate ecranele sunt din televizoare desfacute de mine, am notat televizorul pe care eu l-am avut in fata in acest caz)
– codurile si prezentarea benzilor de led-uri (numarul de LED-uri pe fiecare banda si distributia benzilor pe backlight) daca este un televizor cu backlight LED

62 Drivere gate (laterale = tip urechi) pentru ecranele LCD – LED

In acest numar al revistei sunt prezentate 62 de drivere laterate (urechi) cu mentionarea corespondentei anumitor puncte de pe driverul superior cu pad-urile driverului lateral
Cele 62 de drivere sunt completate din informatiile culese de mine in ultimii 4 ani din diverse surse (personal , colegi sau internet) si puse toate la un loc
Evident exista sute de tipuri de drivere laterale , dar acesta este un inceput extrem de util , pentru o contabilizare cat mai completa a acestora
Observatie extrem de utila !
Acelasi driver lateral (ureche) poate fi intalnit pe ecrane diferite , dar corespondenta pad-urilor este aceeasi – difera de la ecran la ecran doar driverele superioare si pozitionarea punctelor de corespondenta pe acestea .
Deoarece pe driverele superioare semnalele si tensiunile sunt marcate in general clar , este foarte util sa stim ce semnifica pad-urile de pe driverele laterale .
